FIG. 22

Diagram illustrating a schematic view of a device 100 in a first state. The device is shown in a cross-sectional view, divided into two main sections, B and A, indicated by brackets at the bottom. Section B (left) includes a circular component 106, a rectangular block 244, and two V-shaped components 245 and 246. Section A (right) includes a rectangular block 250, a circular component 252, a rectangular block 254, a rectangular block 256, a rectangular block 264, and a rectangular block 266. The components are interconnected, with 244 and 264 forming a central assembly. The device is shown in a first state, where the components are in contact or close proximity.
